

Flu Vaccines: Call Today to Schedule Your Appointment!

Your providers at [TLC Pediatrics, PLLC](#) recommend that all children 6 months and older get an annual flu vaccine. If you or your child have not had a flu vaccine since August 1, 2026, we recommend getting it as soon as possible. Making sure your child is up to date on vaccinations is very important.

Children ages 6 months to under 9 years old receiving a flu vaccine for the first time (and those who have had only one previous dose) will need two doses, 4 weeks apart, to be considered fully vaccinated for this flu season.

We have received our flu vaccines for all our patients! We are also offering flu vaccines for eligible parents and caretakers under the age of 65 years. If you would like to receive your vaccine with your child, please let the receptionist know when scheduling so we can see if you are able to receive a flu vaccine at our clinic at no cost to you.

The flu vaccine is safe and effective. It reduces the risk of your child catching the flu and their risk of suffering serious complications. Children younger than 5 years and those with certain chronic conditions are at increased risk for complications and hospitalizations due to the flu. Please use the link below for more information.

Vaccination is the best protection! A flu shot is quick, easy and covered by most insurances. Call TLC Pediatrics at 501-327-2444 to schedule your child's flu vaccine today!
